

Print and encode all **your cards!**

The color printer to personalize
your single-sided cards, by the unit
or in volume

Pebble⁴

Pebble4 is the ideal printer to seamlessly personalize your cards, on demand or in volume. **Pebble4** leverages a large selection of consumables and encoding options - magnetic stripes, contact smart cards and contactless cards - to personalize all your cards, from ID badges to the most sophisticated payment cards.

Here is a reliable printer with top-notch performance. **Pebble4** guarantees fast personalization of cards by the unit and can also issue personalized cards in volume. You now have in your hands the perfect solution to personalize your cards at anytime.

QUALITY AND RELIABILITY

Pebble4 leverages a market-proven technology that matches top performances with quality graphics and fast printing throughput. Evolis offers a full 3-year warranty on its **Pebble4** printers, which speak volume about their reliability.

APPLICATIONS

Loaded with the latest technologies for printing on plastic, **Pebble4** provides solutions that cater to the most stringent requirements from medium to large businesses, banks, retail stores, governmental authorities and agencies, as well as leisure resorts and casinos.

- Employee badges
- Secured access control cards
- Payment cards
- Driver's licenses
- Leisure resort passes
- Health cards
- Transit passes
- Loyalty cards
- Event cards (visitors and exhibitors)

BENEFITS

■ High performance and affordability

Pebble4 sets the benchmark with a stunning throughput of 150 cards per hour in color and 1,000 cards per hour in monochrome, along with top-quality graphics. The printer benefits from a wide array of consumables designed by Evolis to keep a check on your costs. For a driver's license application, for example, using a half-panel ribbon can cut your cost by at least 30%.

■ A large choice of encoders

To support all requirements, from access control badges to payment cards, **Pebble4** can be fitted with multiple encoders for contact and contactless smart cards: 125 KHz, 13.56 MHz and even UHF technologies. This encoding offer is regularly updated to give you the latest innovations on the market.

■ State-of-the-art technology

Pebble4 has been designed to offer a wide variety of options to its users: its internal USB hub makes it possible to instantly connect specific encoders, while the USB and Ethernet TCP/IP ports are used to network it and link it to systems operating with Windows, Mac OS X or Linux.
